

## SME 217 Continental Automotive Services Tour Thursday 5 April 2018 4:30 pm

Presentation: Mike Dallmeyer, Engineering Director Continental Automotive Systems  
Continental Automotive Systems:

The Newport News location operates within the Engine Systems Business Unit of the Powertrain Division. This Business Unit provides Electronic Control Modules (both software and hardware), Fuel Pumps, Pressure Regulators, Turbo Chargers, as well as Fuel Injectors for diesel and gasoline applications. Newport News is the lead location for all product/process designs used in the manufacturing of Low Pressure Port Fuel Injection Systems and Exhaust After treatment Components. As a lead location it supports manufacturing operations in Italy, China, and India. In addition, the Newport News staff provides technical support to car manufacturers from around the globe.

**Society of Manufacturing Engineers SME Chapter in Virginia (The Apprentice School S354)**
